

Art Farm Flowers

~Wedding Information Form~

Thanks for your interest in sourcing locally grown blooms for your special day! The following questionnaire helps guide us to develop a plan for your wedding flowers. Please email the completed form to us at artfarmflowers@gmail.com, and we will be in touch to schedule a consultation. We understand your plans are still in the works, so please fill out what you know, and we will work from there. We strongly encourage you to share photos and pinterest boards to help us clarify your vision and to give you an estimate based on your needs.

To book our floral design services we require a \$200.00 save the date deposit (applied to your final payment), and signed Floral Agreement to confirm. We recommend new '22 and '23 inquiries to communicate with us between November and April if possible. Once our busy farm and wedding season begins in April we shift gears to focus entirely on the season's weddings and managing the farm. We will have very limited time to communicate and give you the full attention and consideration you deserve until the work slows down in late fall.

Due to very high demand on weekends, we only offer full service floral design in Cooperstown, or within 15-20 miles of Cooperstown, NY. DIY flower buckets are recommended for barn venues outside of our delivery range.

**While we custom make many installations and designs, we do not commit to elevated centerpieces atop 2FT tall fluted or geometric vases, due to their requirement for floral foam to execute.*

Design It Yourself (DIY) Flowers

This option is great for the thrifty or creative couple. Design your own centerpieces, ceremony, and/or personal flowers with friends or family a day or two before the wedding. We can also do a combination of DIY buckets and full service design if you prefer us to design the trickier things like bridal bouquets and boutonnieres and order buckets for the easier arrangements. If going this route, please specify which items (above) you would like buckets for and which you'd like us to design. We are happy to help guide you on how many buckets you may need for X amount of designs.
